

Sikorsky S-76 JetFan Ventilation System

Developed by Air Comm Corporation

S-76 JETFAN Ventilation System

ACC's cockpit ventilation system provides fresh airflow during ground hover and cruise operations. The JetFan air mover design is based on aeronautical principles used for decades to move aircraft fluids.

SPECIAL FEATURES

- Lightweight
- No moving parts
- Requires no electrical loading
- Does not affect aircraft performance
- Belly-mounted flush inlets provide cockpit ventilation during cruise operation

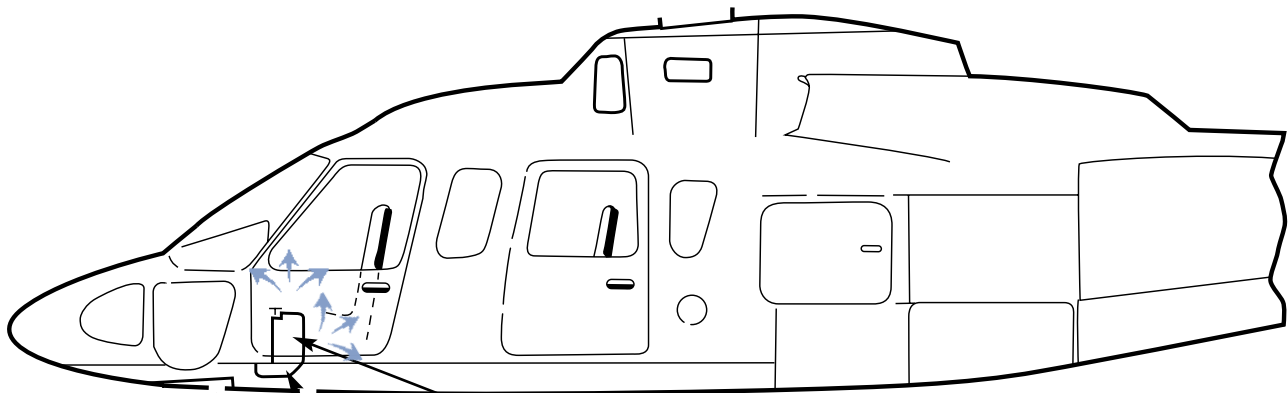

ACC Is Your Best Choice. Here's Why We're America's Leader.

ACC products and technical support set the industry standard; our leading edge design, operating efficiency and factory service optimize system performance with minimal maintenance.

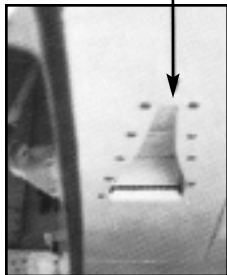

- Proven performance worldwide
- Comprehensive, user-friendly installation drawings
- ACC installation technicians available for training & support worldwide
- Outstanding product support
- Lighter weight

ACC Technology Leads the Industry

HIGH-EFFICIENCY SYSTEM

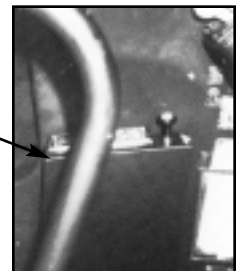

Flush inlets (2)

JETFAN air movers

Fresh air box (one each side of console)
