

Bell 429

COCKPIT HEATER / WINDSHIELD DEFROSTER High Performance Heating System

ACC's capabilities include design, manufacture and support for civil and military rotorcraft and fixed-wing air management systems, development of custom air management solutions for avionics and electronics cooling systems, fluid systems, pneumatic and electric environmental controls, blowers, valves and ducts. ACC also specializes in electro/mechanical air management system and component design, development, certification and FAA program management. The company is ISO9000/AS-9100 certified.

Capabilities

- Air outlets located at floor level
- Low noise level
- Exceptional thermal output
- Warm air directly on windshield for effective defrosting
- Supplemental blower aids windshield defrosting with or without warm air
- Lightweight, maintenance-free mini-ejector system
- Temperature sensors for system and occupant safety
- Electric system on/off switch
- Highly reliable manual flow control valves
