## VAPOR CYCLE AIR CONDITIONER High Performance Cooling System

ACC's capabilities include design, manufacture and support for civil and military rotorcraft and fixed-wing air management systems, development of custom air management solutions for avionics and electronics cooling systems, fluid systems, pneumatic and electric environmental controls, blowers, valves and ducts. ACC also specializes in electro/mechanical air management system and component design, development, certification and FAA program management. The company is ISO9000/AS-9100 certified.

### Capabilities

- High reliability, low maintenance brushless DC blower motors
- Variable speed evaporator blowers
- Variable temperature control
- Serpentine heat exchangers promote high thermodynamic efficiency
- Improved condensate drainage for high humidity environments
- Highly accessible components for ease of maintenance
- Leak proof Tork-Lok refrigerant fittings
- Standard 4 evaporator system
- Optional 2 evaporator system reduces weight
